M. Fadhlul Rahman Prabowo

Full-Stack Developer

+6281386263605 | fadhlulrahman687@gmail.com | Bekasi, Indonesia

LinkedIn | Github | Portofolio

I am a **Full-Stack Web Developer** who produces complete, production-ready applications. My process begins with **designing responsive and attractive user interfaces** using **React.js**, **Redux**, and **Tailwind CSS**. Then, I **build the supporting logic** with the backend using the **Go** programming language and **Gin** as a high-performance framework, following **Restful API design** and **MVC patterns** for **clean and maintainable code**. I **ensure data** is structured **for performance** and **scalability** by converting **ERDs** into optimised **PostgreSQL** databases, then using **Redis** to store frequently accessed data in RAM (in-memory) to reduce latency and significantly improve application performance. To integrate everything, I **utilise Docker and Linux servers** for consistent, isolated, and **efficient deployment**. A graduate of Koda Tech Academy, I combine a strong foundation with a passion for learning and **continuously mastering new technologies**.

Experiences

Koda Tech Academy - **Bogor, Indonesia** **Okt 2025 – Feb 2026**

Fullstack Web Developer Trainee

MyPortofolio - Portofolio for Personal Web | *February 2026*

- Designed and developed a modern personal portfolio website to showcase technical skills and projects, with a fully responsive layout optimized for mobile, and desktop users.
- Built a modular and maintainable frontend architecture using React.js with reusable components, and styled with Tailwind CSS for a clean, professional design system.
- Implemented advanced responsive design techniques using Tailwind's built-in media queries and custom breakpoints to ensure seamless viewing across all device sizes.
- Resulted in a polished, performance-optimized portfolio that demonstrates frontend development expertise and serves as a professional personal branding tool.

Simple Media Social Service API | *February 2026*

- Designing and implementing RESTful APIs using Gin (Framework for GO) as well as designing relational database schemas (ERD) and implementing PostgreSQL, in order to handle Login, Logout, Register, Create Post and Follow Account features.
- Store frequently accessed data with Redis.
- Implemented JWT-based authentication and role-based access.
- Applied MVC/Clean Architecture for modular and scalable backend.
- Containerized backend service using Docker for deployment.

Solid Coffee - Online Order Coffee Web App | *February 2026*

- Developed a full-featured online coffee shop platform with responsive design for both mobile and desktop users.
- Integrated product list and filter, create an order, and user authentication using Golang and PostgreSQL, secured with JWT and store frequently accessed data with Redis.
- Built a modular frontend using React.js, Tailwind CSS, React Router, and Redux Toolkit, with role-based access for users and admins.
- Resulted in a functional, end-to-end order system showcasing fullstack development capabilities.

Tickitz - Movie Booking Web App | *Desember 2025 – February 2026*

- Developed a full-featured movie ticket booking platform with responsive design for both mobile and desktop users.
- Integrated movie listing, seat selection, and user authentication using Golang and PostgreSQL, secured with JWT and store frequently accessed data with Redis.

- Built a modular frontend using React.js, Tailwind CSS, React Router, and Redux Toolkit, with role-based access for users and admins.
- Resulted in a functional, end-to-end booking system showcasing fullstack development capabilities.

PT Telkom Witel Karawang - **Karawang, Indonesia** **Mar – Jun 2023**

Data Entry - Internship

- Managing Raw Data from Sales or account Manager with enterprise-specific software (Starclick).
- Accompany and support the account manager's when meeting clients.
- Responsible for liaising between field technicians and server administrators.
- Responsible for recording the history of contracts between the department and clients in the department's history book.

Education

Koda Tech Academy - **Bogor, Indonesia** **Okt 2025 - Feb 2026**

Fullstack Web Developer Trainee

- Learnt front-end development practices: HTML, CSS, React Js, Redux Toolkit, Tailwind CSS
- Learnt back-end development practices: Golang, Gin-Gonic, PostgreSQL, Redis, Postman, Swagger
- Basic DevOps practices: Working with WSL, Docker, nginx, and SSH for local deployment

Electrical Engineering, SingaPerbangsa Karawang University - **Karawang, Indonesia**

Bachelor Degree **Sep 2020 - Agu 2024**

- Learnt about Basic Programming: C, C++, PHP
- Learnt about Artificial Intelligence: Google Colab, Phyton, Fundamental Artificial Intelligent, Computer Vision, Machine Learning and Deep Learning
- Micro Controller practices: Development automatic water sprinkler and intergrate with Computer Vision to detect Fire

SKILL

Frontend Development – JavaScript, HTML5, CSS, Responsive Design, React.js, Vite, Redux, Tailwind CSS
Backend Development – Golang, Gin, REST API, Clean Architecture, Middleware, JWT Auth, Database Integration
Database – PostgreSQL,MySql,Redis, SQL
DevOps & Deployment – Docker, Docker Compose, Linux CLI
Testing – Backend API Testing (Postman)
API Design – RESTful API, OpenAPI/Swagger Documentation
Version Control – Git, GitHub, GitLab, Git Flow
Project Management – Scrum
Cloud & Hosting – Vercel
Security & Best Practices – Input Validation, JWT, CORS
